2. github git, pgp .

The screenshot shows the GitHub 'Settings' page for a user profile. The browser is Mozilla Firefox. The page title is 'Your Profile — Mozilla Firefox'. The address bar shows the URL 'https://github.com/settings/keys'. The left sidebar contains a navigation menu with categories: Access, Billing and plans, Emails, Password and authentication, Sessions, SSH and GPG keys, Organizations, and Moderation. Under 'SSH and GPG keys', there are links for Repositories, Codespaces, Packages, Copilot, Pages, and Saved replies. The main content area is titled 'SSH' and lists two SSH keys. The first key was added on Oct 12, 2022, and the second key was added on Oct 15, 2022. Below the SSH keys, there is a section for 'GPG keys' with a 'New GPG key' button. The GPG keys section states: 'This is a list of GPG keys associated with your account. Remove any keys that you do not recognize.' and lists one GPG key with its email address, key ID, and subkeys. At the bottom, there is a link to 'Learn how to generate a GPG key and add it to your account.' and a 'Vigilant mode' section.
